

WaterRows

INDUSTRIES

Design.

Forms.

Pools.

More than a pool.

A private ritual.

The light that welcomes your evenings.

The shape that holds your stillness.

The water that resets your mind.

This is not about swimming.

It's a reconnection with yourself.

LED light isn't an add-on.

It's the signature
of WaterRows.

Your day starts with light.
Reflected by water.
Defined by form.
Your night ends in silence.
Illuminated from within.
Held by design.
This is what it means to live
with a pool.

The WaterRows pool.

NEW BRAND, WELL-KNOWN PEOPLE

We are the team behind one of the most successful pool factories in Europe. Today, we're building something new — bolder, more focused, more refined. WaterRows is our shared vision for a new generation of pools.

Made with experience. Driven by design.

Our motivation is our experience

Miroslav Ruziak Managing Director

"Vision and the right people will take you beyond boundaries."

Over 25 years of experience in the pool business. He founded and ran a successful ceramic swimming pool factory in Slovakia, Compass Europe. He has experience in selling swimming pools in 27 countries worldwide.

Linda Lackovicova Head of Marketing & Sales

"This brand is built to challenge what pool design. WaterRows isn't just a product. It's a statement."

10+ years of experience in the swimming pool segment as CMO and international sales for Compass Europe. More than 23 years of experience in managerial positions in marketing, branding, PR and strategy.

Ivan Gata Head of Finance

"I've spent my career in finance. I've seen hundreds of projects. But very few combine deep know-how, premium positioning, and a real market gap. WaterRows is one of them. That's why I invested — not in pools, but in people who know exactly what they're doing."

Strategic investor of the project with extensive experience in the financial sector.

Andrej Deglovic Head of Production

"More than 20 years ago, I went to Australia to learn how to build ceramic pools. I've been in production ever since — every day, every detail. I know what makes the difference between a pool and the pool. Production is not routine. It's precision that counts."

Expert in the production of ceramic swimming pools with more than 20 years of experience. Professional in setting up and optimizing production, selecting suitable materials and suppliers.

Integrated LED lighting - breathtaking atmosphere

Where light meets design.
There is lighting.

And then there is light that becomes part of the pool
itself. We are the only composite pool manufacturer
with fully integrated LED lighting — seamlessly
embedded into the shell, enhancing every curve,
guiding the eye, and opening a new visual dimension.

It's not just illumination.
It's an experience.
The sky darkens.
The air softens.
Your pool awakens.
Light shimmers beneath the surface — calm, quiet,
alive.
Night begins in color.
Crafted exclusively for our pool lines.
Unforgettable by day and night.

Developed in exclusive
cooperation with

leditaly.com

COLORS

Every color tells a story. Our palette is more than a design choice — it's an emotional layer of your pool. From soft minerals to vivid reflections and sparkles, each finish responds to light, time, and water. Crafted to elevate outdoor spaces with timeless elegance — for those who see the pool as architecture, not just a product.

YOU SIMPLY WON'T FIND A BETTER POOL

Graphene Ceramic Technology brings nanotechnology to pool manufacturing. Therefore, our pool is the strongest yet in bending and impact without increased weight and moreover with higher water and chemical resistance.

MX 5 - OUR INNOVATIVE HEART

We manufacture the moulds in-house, which means we have full control over the entire process - from the design to the final production of each individual mould. The CNC mill allows us to creatively design the unique shapes and lines of our pools. With this cutter, we are introducing one of our most significant pool innovations - integrated LED lighting directly into the body of the pool.

MX5

F

Inhouse CNC machine MX5 – the potential of unlimited possibilities

The production of customised moulds plays a key role in the success of pool manufacturing.

We are the first pool factory in the world to introduce a full 5-axis milling machine for model production. With the MX5, our moulds are accurate, have timeless designs and are produced quickly with efficient material consumption.

Design isn't the
final touch. It's the
starting point.

At WaterRows, every pool begins with design
— not just in form, but in experience.

We don't follow trends. We shape
environments. Design defines how the pool
lives in space. Design defines how the pool
makes you feel. That's why it's not just
important — it's everything. Our forms
are clean, bold, and essential — guided by
symmetry, balance, and precise proportions.

Each curve is shaped down to the millimetre
by the heart of our innovation: the MX5 CNC
system. Inspired by boat and yacht building,
our production setup is unique in the
composite pool industry — created to deliver
perfect form, every time.

INFLOW CLEANING SYSTEM

Invisible cleanliness.
Intelligent circulation.

Inflow Cleaning System is an automatic cleaning solution with nozzles integrated directly into the pool floor and steps. Designed to keep the water crystal clear — without the need for robots or manual cleaning. Retractable jets gently push debris toward the main drain, ensuring thorough cleaning across the entire bottom surface. At the same time, the system provides even water circulation, improving heating efficiency and chemical distribution. The result? Lower energy consumption, less chemical use, and significantly reduced maintenance effort.

The main advantages of our Inflow cleaning system:

Automatic cleaning –
all season long, even
while you're swimming

Lower consumption
of chemicals
and energy

Suitable for all
our pool models

Clean floor, corners,
and steps – completely
without cleaning robots

Elegant and almost
invisible design

INVISIBLE INTELLIGENT INTEGRATED

Cover protection that takes no space.

Our integrated slatted cover is designed as part of the pool itself – elegantly hidden, fully functional, and visually seamless. No external housings. No compromise in design.

Safety

protects from accidental falls into the pool

Energy efficiency

retains water temperature, reduces heating costs

Cleanliness

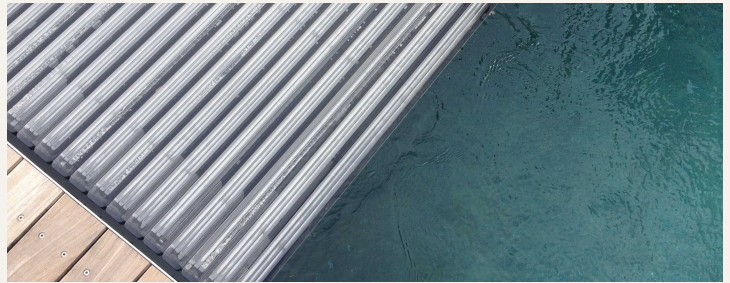

minimizes debris and dirt from the environment

Discreet

fully concealed below the waterline

Komfort Convenience

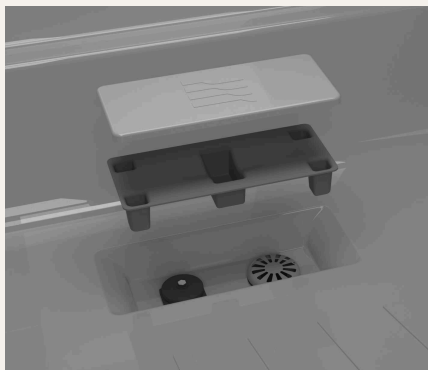

fully automated control

Developed for our Pool-portfolio by
